## System 7: Third-Party Drives and Virtual Memory

Article Created: 6 June 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

We update the hard disk drivers for Apple drives if the user is to make use of virtual memory. Do users of third-party hard disks need to update their drivers?

DISCUSSION -----

No. The update corrects something in Apple's SCSI drive. Third-party drives don't need the update unless their manufacturer says they do.
