## System 7: Optimizing Hard Disk Space with Virtual Memory (4/93)

Article Created: 14 April 1993

TOPIC -----

I attempted to free up some space on my hard drive, so I dragged more than 7MB of files into the Trash. Even after I emptied the Trash, the Finder showed less than 1MB free. Can you explain?

DISCUSSION -----

Look in the Control Panels folder under Memory. Check to see that you haven't set your Virtual Memory allocation to its maximum. If you turn Virtual Memory off (or down a bit), and restart the computer, you should have more free space on your hard drive.
