Macintosh Finder: fPRT Resource Not a Virus

Article Created: 18 January 1990
Article Last Reviewed: 2 February 1991
Article Last Updated:

TOPIC -----

Is there an fPRT virus? Something appears to have added 144 bytes to the System 6.0.3 Finder and a new fPRT resource.

Is there anything strange about an fPRT resource being added to the Finder?

DISCUSSION -----

The existence of the fPRT resource in the Finder is not an indication of a virus. Although there is no fPRT resource in the Finder as it is shipped on System Software disks, it is a resource belonging to the Finder. When you choose Page Setup from the Finder's File menu, the Finder stores the settings you have chosen in an fPRT resource for future reference.
