## System 3.3: Don't Use with Macintosh SE or Macintosh II

This article last reviewed: 1 September 1987

A recent item in the Tech Support folder ("AppleShare 1.0: Installing with System") stated that it is OK to run System 3.3 with Finder 5.4 on a Macintosh II.

This is emphatically not OK -- you should not run 3.3 on either a Macintosh II or Macintosh SE.

- a Macintosh II requires System 4.1 or later.

- a Macintosh SE requires system 4.0 or later (4.1 is even better).
