AppleShare 2.0.1 and System Software 6.0.2

This article last reviewed: 10 January 1989

Those wishing to update their AppleShare networks with the latest system software (version 6.0.2) may already have updated to the latest AppleShare (version 2.0.1), or may be using a previous version of AppleShare. The following instructions will help with both situations.

To update a server already running AppleShare 2.0.1:

1. Shut down the server.
2. Restart with the System Tools 6.0.2 disk.
3. Launch the Installer.
4. Select the type of computer.
5. Click the Install button.
6. Once installation is complete, click the Quit button.
7. In the Finder, select Restart.

To update the server with both AppleShare Server 2.0.1 AND System Software 6.0.2:

1. Shut down the server.
2. Restart with the AppleShare File Server Installer disk.
3. Launch the Installer.
4. Select AppleShare Server (2.0.1).
5. Click the Install button.
6. Once installation is complete, click the Quit button.
7. In the Finder, select Shutdown.
8. Restart with the System Tools 6.0.2 disk.
9. Launch the Installer.
10. Select the type of computer.
11. Click the install button.
12. Once installation is complete, click the Quit button.
13. In the Finder, select Restart.
