## CD-ROM Driver 3.0.2: Has Same Code as Version 3.0.1

Article Created: 14 June 1991

Article Last Updated:

TOPIC -----

I just downloaded the "new" CD-ROM Drivers from the Apple Software Updates folder on AppleLink. The creation and modification dates are the same on both versions 3.0.1 and 3.0.2. How could these files have different version numbers but have the same modification dates?

DISCUSSION -----

The actual difference between the two versions amounts to a date change in one of the files, but there was no actual code changes between the two drivers.
