CE QuickMail: Apple Tape Backup Incompatibility

This article last reviewed: 14 November 1989

TOPIC ---

This article contains information about a QuickMail/Apple Tape Backup problem.

DISCUSSION --

CE Software's QuickMail 2.0 server INIT causes the Apple Tape Backup software
to freeze or crash the system when it is launched.

As of November of 1989, the only known workaround is to remove the QuickMail
server INIT from the System Folder and restart the machine before attempting to
back up the server.
