PowerBook: Use VersaTerm 4.6 and VersaTerm-PRO 3.6

Article Created: 10 July 1992

TOPIC ---

I'm using VersaTerm by Synergy Software on my Macintosh PowerBook 170.
When I press the Enter key, nothing happens. The Enter key works fine with
other applications like Microsoft Word and Microsoft Excel. Also, if I
connect an Apple Extended Keyboard to the PowerBook, the Enter key on this
keyboard works correctly.

DISCUSSION ---

On the Apple Extended Keyboard, the Enter key has a virtual key code of $4C;
on the PowerBook keyboard, the Enter key has a virtual key code of $34. Both,
however, generate ASCII code $03.

Synergy technical support said that you need to use VersaTerm 4.6 and
VersaTerm-PRO 3.6 with the PowerBook computers. Contact Synergy Software
directly for upgrade information.

To locate a vendor's address and phone numbers, use the vendor name as a
search string.
