System 7: Compatibility with Farallon Ethernet Drivers

```
Article Created: 7 December 1992

TOPIC -------------------------------------------------------------

I need a list of System 7 compatible Farallon drivers.

DISCUSSION --------------------------------------------------------

Here's a  list of Farallon compatible driver versions:

Product                        Current Version      Minimum Required
                                                      for System 7
Phonenet Ethernet (Nubus)         4.1                    4.0.1
Phonenet Ethernet (SI,SE30)       4.0.1                  4.0.1
EtherMac Cards                    1.0                    1.0

Incompatible Driver Problems
----------------------------
If the Ethernet driver software isn't updated to the minimum needed for
System 7, you may experience a variety of problems, including:

• Intermittent network disconnects
• Data transfer slow-downs
• The inability to turn Ethernet on in the Network control panel

To locate a vendor's address and phone numbers, use the vendor name as a
search string.
