## Multiplan 1.02, 1.01 and 1.0: Saving large clipboard

This article last reviewed: 21 April 1986

The "saving large clipboard" dialog comes up any time you have more than 50 cells in the clipboard. If you have more than 100, both the check boxes are off, otherwise both are on. You never get one off and one on. If you save Formatted, you get a TEXT scrap--complete with dollar signs, etc. If you save unformatted you get a value scrap--the raw numbers to the best accuracy plan can produce (for pasting to Chart or BASIC).

When running Multiplan and EXCEL through the Switcher, you must select a large enough area to get this dialog box in order to get the information into the clipboard and copy it to Excel. Otherwise it will not enter the clipboard when you switch applications.
