## Telnet Access: Using the Apple Communications Toolbox (9/95)

Article Created: 21 April 1991

Article Reviewed/Updated: 18 September 1995

TOPIC -----

The MacTerminal manual hints that you can use MacTerminal in a TCP/IP environment. How? Can I use MacTCP with MacTerminal, or do I need something else to work with the Apple Communications Toolbox?

DISCUSSION -----

There are several products that provide telnet access for programs that access the Communication ToolBox. Some are Sysnet Corporation's TCPack, InterCon's Telnet Driver/Tool, and Synergy Software's VersaTerm Pro.

To locate a vendor's address and phone number, use the vendor name as a search string.

### Article Change History:

18 Sep 1995 - Corrected vendor information.

21 Nov 1994 - Added VersaTerm Pro to the list of software available.
