TOPIC ---

I want to create high-end forms. Claris' SmartForm is not powerful enough,
nor does it have many of the features that a dedicated, high-end, forms
processing and creation system has.

Are you aware of any high-end products for the Macintosh?

DISCUSSION --

Below are the names of three forms creation and management software
publishers. Feature sets vary across the three. Each is strong in some
areas and weak in others when compared to SmartForm from Claris. Apple is
currently evaluating forms software for its own use. The project leader is
very excited about features of packages not yet on the market. Great
advances are expected in the next six months.

Here are the three packages and their publishers:

• Informed Designer from Informed Manager

• if/x: series from Softview

• True Forms from Adobe Systems, Inc.

For contact information, search the Technical Info library under the name
of the publisher.
