Disk Doubler 3.7.7i: System 7 Pro (10/93)

Article Created: 22 October 1993

TOPIC ---

DiskDoubler version 3.7.7.i comes bundled on Apple external hard
drives. Fifth Generation System's DiskDoubler v 3.7.7i compresses
files, saving storage space. This article describes a problem with
DiskDoubler 3.7.7i and System 7 Pro.

DISCUSSION ---

The only known problem occurs during installation in 24-bit Memory
mode. If you restart your computer with the DiskDoubler INIT loading
before the new Finder creates its Preferences file, your system will
crash. The solution is to start up without extensions, letting the
Finder create the preferences file, and then restart so your extensions
load.
