Turn Virtual Memory Off Message and RAM Doubler (6/95)

Article Created: 8 June 1995
Article Reviewed/Updated: 28 June 1995

TOPIC ---

When I launch some of my programs (The 7th Guest, and Myst for example) I'm
shown a dialog box requesting me to turn virtual memory off. When I checked the
Memory control panel, virtual memory is already off. What could be causing
this?

DISCUSSION --

Check to see if you are using RAM Doubler by Connectix. Many of the functions of
RAM Doubler are similar to the way virtual memory operates. A temporary
workaround is to remove RAM Doubler from your Extensions folder and restart. You
should contact Connectix for further information about RAM Doubler.

The Tech Info Library article titled "Locating Vendor Information" can help you
search for a particular vendor's address and phone number.
