TOPIC ---

I am using the QuickTake 100 software with MS-Windows 3.1, and I cannot always
copy and paste images from the QuickTake software into all Window Applications.
I can copy and paste into some applications like Microsoft Word, Excel, and
Powerpoint, but not into Lotus Notes. Is there a way to directly paste into all
applications from the QuickTake software?

DISCUSSION --

The QuickTake application creates compressed JPEG files. Microsoft Word, Excel
and Powerpoint can use the compressed JPEG files, but any application that
cannot support the JPEG format, cannot use the copy and paste option.

The only workaround for your problem, is to use an application like Adobe
Photoshop or Aldus PhotoStyler to export the QuickTake JPEG file as a PICT file.
Once the file is in this format, you should be able to copy and paste between
applications.
