QuickTake 100/150: Replacement Windows Cables (1/97)

Article Created: 27 January 1997

TOPIC -----

I cannot find the cable that connects my QuickTake 150 to my DOS/Windows computer. How can I get a replacement cable?

DISCUSSION -----

The communication cable, which shipped with both the QuickTake 100 and QuickTake 150, is available as an Apple service part. Depending on the serial port configuration on your Windows computer, you may need an adapter. You can purchase these parts from your local Apple service provider.

Begin_Table

Cable name	Apple P/N	Description
Din-8 to DB9	922-0676	Connects the QuickTake 100 and QuickTake 150 camera to DOS/Windows computers with DB9 serial port.
DB9 to DB25 Adapter	922-0675	Adapter for DOS/Windows computers with DB25 serial port. Use this adapter in conjunction with the Din-8 to DB9 cable.
