PowerBook 3400	& Open Transport 1.1.2 Incompatibility (3/97)
=========	
Article Created	1: 12 March 1997
TOPIC	
well until the	en Transport (OT) 1.1.2 on my PowerBook 3400 computer. All seemed computer went into sleep mode and then it froze. I have been able his several times. What is wrong?
DISCUISSION	

There are some incompatibilities between Open Transport 1.1.2 and the PowerBook 3400 computer. We were able to reproduce freezing by repeatedly switching between IRTalk and Printer/Modem port in the AppleTalk control panel.

We suggest you reinstall Open Transport 1.1.1. There are no fixes in Open Transport 1.1.2 that apply to the PowerBook 3400 computer.
