Newton Connection Kit: Isn't Compatible w/ Newton 2.0 OS (11/96)

Article Created: 18 November 1996

TOPIC ---

I recently upgraded my Apple MessagePad 120 with the Newton 1.x OS to a Apple
MessagePad 130 with the Newton 2.0 OS installed. I can no longer get my Newton
Connection Kit to work. Why?

DISCUSSION --

You cannot use the Newton Connection Kit with the Newton 2.0 OS. A replacement
for the Newton Connection Kit will be available from Apple Computer, Inc. at a
later date. In the meantime, look at the Tech Info Library article titled
"Newton OS 2.0: Newton Connection Utility Alternatives". This article proves
several options for transfering data from a Newton 2.0 OS device to both a
Macintosh or Windows computer.

You can also use the Newton Backup Utility to backup and restore the information
on you Apple MessagePad 130 device.
