## Apple Two-Page Monochrome Monitor: Supports 4 Gray Levels

This article last reviewed: 22 June 1989

TOPIC -----

How many gray levels does the Apple Two-Page Monochrome Monitor Video Card support?

DISCUSSION -----

The Apple Two-Page Monochrome Monitor Video Card (M0260) supports four levels of gray in its standard configuration. The video card accepts additional video memory, which lets it support 16 levels of gray. The Video Memory Expansion Kit (M0213) is the same as for the standard Macintosh II Video Card.
