Display Cards 4•8, 8•24, 8•24 GC: Monitor Video Cables (2/94)

This article last reviewed: 23 February 1994

TOPIC -----

What are the part numbers of the cables used to connect the new Display Cards 4•8, 8•24, and 8•24 GC to these monitors:

- High-Resolution Monochrome Monitor
- AppleColor High-Resolution RGB Monitor
- Portrait Display
- Two-Page Monochrome Monitor

DISCUSSION -----

The proper cable to use with the High-Resolution Monochrome Monitor and the AppleColor High-Resolution RGB Monitor is Apple Part #590-0161 (DB-15 to DB-15).

To connect the Portrait Display or Two-Page Monochrome Monitor to any of the new Display Cards or to the Macintosh IIci built-in video connector, use cable Apple Part #590-0615 (DB-15 to 13-pin mixed-contact D-connector).
