## RasterOps 224 Card: Upgrade Available

This article last reviewed: 12 June 1990

TOPIC -----

When the RasterOps 224 card was first announced and shipped, the field offices received one for demonstration purposes.

I have found this card to be a good 24-bit solution on the AppleColor High-Resolution RGB Monitor, but the card seems to crash often. I called RasterOps and found that we have old ROMs.

The Tech Support Manager said that RasterOps would upgrade the cards sent to the field at no charge.

DISCUSSION -----

We spoke with RasterOps Tech Support and confirmed that they would upgrade the cards we shipped to the field. Contact RasterOps to get version 1.43 of the ROMs and version 1.5 of the Graphics System Software.
