ImageWriter II: Problems with Jamming and Ribbon Tension

Article Created: 14 June 1991

TOPIC ---

My ImageWriter II printer randomly jams if its printer ribbon is snug. The
same ribbon works fine on other printers.

Are there any specifications regarding the tightness of the ribbon for the
ImageWriter II printer?

DISCUSSION --

There are no specifications for the tightness of winding the ribbon.

If the same ribbon works in another printer it should work in your printer.
Try replacing the ImageWriter II's ribbon wire. A new spring may be all
that's needed to get your ribbon advancing.
