## ImageWriter II: Cable for Network (12/93)

Article Created: 10 December 1993

TOPIC -----

I want to connect (network) two Macintosh Computers, so they will be able to share files. Is it okay to use a DIN-8 serial cable, to connect the two computers?

DISCUSSION -----

In theory it will work. However there are several known cases where it does not. The recommendation is to NOT use it.
