## Mac241 Prints to ImageWriter LQ Unidirectional Only

This article last reviewed: 11 May 1990

TOPIC -------------------------------------------------------------

I print from White Pine's Mac241 to an AppleTalk ImageWriter LQ and want the
printer to default to bidirectional/Draft mode instead of unidirectional/Best
Quality. Mac241 gives only a Page Setup box and not a Print Options box.

Is it possible to alter the AppleTalk ImageWriter LQ driver to change the
default settings?

DISCUSSION -------------------------------------------------------

If the driver was modified in this way, the software would then be unsupported.

White Pine Software confirmed that the software does not offer the user a
choice of unidirectional of bidirectional.
