LaserWriter Plus: Running Out of Memory Problem

Article Created: 15 July 1990
Article Last Reviewed: 18 March 1992
Article Last Updated: 18 March 1992

TOPIC -----

On my LaserWriter Plus, I'm printing a lot of non-LaserWriter fonts and graphics. I often get the error message that printing exceeds printer memory. How can I fix this?

DISCUSSION -----

The LaserWriter Plus comes with 1.5MB of RAM. Since the LaserWriter Plus cannot be expanded with more on-board RAM, your only recourse is to purchase (or upgrade) to a higher-end LaserWriter. The LaserWriter IINT has 2MB of RAM, and the LaserWriter IINTX has up to 12MB of RAM.
