LaserWriter: Compatibility with Kanji Fonts

Article Created: 12 January 1993

TOPIC--

I have the following questions about the LaserWriter IIf and IIg as well as
the LaserWriter Pro 600 and LaserWriter Pro 630:

1) Since they are PostScript Level 2 printers, will they support composite
   fonts?

2) Can you use Kanji TrueType fonts or Kanji PostScript fonts with these
   printers?

DISCUSSION---

1) Neither the LaserWriter IIf and IIg nor the LaserWriter Pro 600 and 630
   support composite fonts at this time. None of these printers has
   a PostScript Level 2 driver and no one has yet created a hard drive with
   all of the KanjiTalk PostScript fonts.

2) TrueType KanjiTalk fonts can be printed to any Macintosh printer since
   the TrueType rasterizer can be resident on the Macintosh (in the case of
   a serial printer), in the printer's ROM (in the LaserWriter IIf, IIg,
   and LaserWriter Pro series), or in the printer's RAM (on other
   LaserWriter printers).

The LaserWriter IINTX-J. is the only LaserWriter that can print documents that
use KanjiTalk PostScript fonts.
