LaserWriter 8.4: Changing the Default Paper Size (12/96)

Article Created: 12 December 1996

Article Reviewed/Updated: 19 December 1996

TOPIC -----

I recently installed the LaserWriter 8.4.x printer software, and now when I print US Letter Small is the default paper size. Is there a way to change this?

DISCUSSION -----

Some printers support both US Letter and US Letter Small paper sizes. To prevent text from clipping or wrapping to the next line on different printers, Apple recommends using US Letter Small. In the LaserWriter 8.4.x printer driver, the default paper size was changed to US Letter Small. Use the steps below to change the default paper size. There are some applications will not save the changes to the default paper size. This is application specific, so you may or may not be able to change the default paper size.

Step 1

Choose Page Setup from the File menu.

Step 2

Change the paper size, and any other selections you want to have for your printing defaults.

Step 3

Press and hold the Option key, then click OK.

A dialog appears verifying that the setting you just made are what you want to be your default printing settings.

Step 4

Click OK
