## LaserWriter IINTX: Available Fonts In HP LaserJet Emulation Mode

This article last reviewed: 25 July 1988

LaserWriter IINTX's HP LaserJet Plus emulation provides access to the Roman, Bold, Italic, and Bold Italic faces for Courier, Times-Roman, and Helvetica fonts.

These are the only PostScript fonts accessible by the emulation. If other symbols or typefaces are desired, they must be purchased as downloadable fonts for the HP LaserJet Plus.

Font styles and typefaces on the LaserWriter IINTX in HP emulation are controlled with HP LaserJet Printer commands. If you need more direct information on font substitution, you can obtain an HP LaserJet manual. You can also purchase a utility like Hewlett-Packard's PCLPak Printer Software Utility (which does printer parameter modification). Such a utility will also download fonts to the HP LaserJet, but will not allow the definition of fonts.

Hewlett-Packard does provide many downloadable fonts for the PC. These fonts are provided in 3.5 and 5.25 inch MS-DOS disks, and cover most of the HP cartridge font units available for the HP LaserJet printers.
