LaserWriter IISC: Use QuickDraw GX to Network (10/96)

Article Created: 19 April 1991

Article Reviewed/Updated: 15 October 1996

TOPIC -----

I want to connect my LaserWriter IISC to an AppleTalk network. Can I do this using the AppleShare Print Server?

DISCUSSION -----

No. The LaserWriter IISC and Personal LaserWriter SC printers were designed as stand-alone SCSI printers. With the standard LaserWriter drivers installed, you cannot use either printer on an AppleTalk network. However, if you install QuickDraw GX, you can use both printers over an AppleTalk network.

Article Change History:

15 Oct 1996 - Added QuickDraw GX solution.
