## LaserWriter IISC: Is a SCSI Device and Cannot Be Networked

Article Created: 5 March 1992
Article Last Reviewed:
Article Last Updated:

TOPIC -----------------------------------------------------------

I have a LaserWriter IISC that I'd like to connect to a small AppleTalk
network.  What do I need to do?

DISCUSSION ------------------------------------------------------

The LaserWriter IISC is a SCSI device and cannot be used as a network
printer.

Apple offers upgrades for the LaserWriter IISC to the LaserWriter IIf or
IIg, which have AppleTalk capabilities built in.
