LaserWriter: Supported Network Protocols (8/93)

Article Created: 18 August 1993

TOPIC -----

This article discusses which network protocols are supported by Apple LaserWriters.

DISCUSSION -----

Apple LaserWriters only support the AppleTalk network protocol and do not directly support other network protocols, whether over LocalTalk or Ethernet.

If you wish to send data from another network protocol to a LaserWriter, you must convert it to the AppleTalk protocol with software or a hardware device.
