## LaserWriter Pro TraySwitching: LW Utility vs Print Dialog (7/93)

Article Created: 5 August 1993

TOPIC -----

What is the difference between turning on the LaserWriter Pro's TraySwitching feature through LaserWriter Utility 7.4.1 and the Options button in the actual Print dialog of LaserWriter driver version 8.0?

DISCUSSION -----

Enabling this option through the Print dialog box will only affect the current job.

Enabling TraySwitching via the LaserWriter Utility will save the selection for all jobs and will retain the setting even when the printer is powered off.
