LaserWriter Pro 810: If It Won't Select Correct Tray (1/94)

Article Created: 31 January 1994

TOPIC ---

I'm having a problem getting my LaserWriter Pro 810 to select a specific
paper tray.

DISCUSSION --

The cure is to restore factory default settings. Here's how:

1) Turn the printer on and wait until it comes ready.

2) Locate the control panel and press the On-line button to force the
   printer "Off-line".

3) Press the Menu button.

4) Press the down arrow until "Misc." appears in the display, then press
   Enter.

5) Press Enter again to select "Restore Factory Setup".

6) Press Enter when the "Factory Setup" question appears.

When you've done all this, the printer will display "Confirmed" and run a
self-test. The printer will return to the ready state once the self-test
is complete.
