LaserWriter Pro 810: Printing from Hypercard (2/94)

Article Created: 7 February 1994

TOPIC ---

When I press Command-P to print a HyperCard stack or card to a LaserWriter
Pro 810 (with a fax modem installed), the printer starts a fax transmission
instead of printing the document.

How can I print a HyperCard document to a LaserWriter Pro 810?

DISCUSSION --

This is a known problem which is documented in the ReadMe file on the
LaserWriter Pro 810 Fax software disk.

To print HyperCard documents to a LaserWriter Pro 810 with a fax modem
installed, press Shift-Command-P so that a Print Dialog Box is displayed
before printing.

Note: If you attempt to print an document by selecting Print from the File
menu, printing problems may occur.
