PostScript Fax: Maximum Limit for Fax Number Field (8/94)

Article Created: 30 August 1994

TOPIC ---

Is there a maximum length to phone numbers entered into the PostScript Fax
phone book?

DISCUSSION --

When establishing the fax phone character limits, consideration was made for
faxing international locations, using calling cards, and other conditions that
required long field lengths. The limits are:

    Fax Number field limit - 126 characters (visible characters - 25)
    DialCallee string limit - 100 characters

From a user perspective the limit is less than 100 characters, somewhere between
 95 to 97, as the DialCallee string limit includes characters the fax driver
places in the string for specifying Pulse or DTMF (Touch-Tone) dialing, possible
DTMF symbols sent to a telephone exchange, pauses, and a character requesting
the fax card to wait for dial tone or not.
