LaserWriter: Driver errors

An "Error in PostScript" message means that there is an error in the code
generated in the driver that Apple has written. The error messages, generated
by the application, would vary with the application.

Here is a list of the Printer Manager errors:

Error Value   Description

```
  0                No error
  128              Abort the printing process
  -1               Problem saving print file
  -17              Unimplemented control instruction
  -27              Trouble with I/O
  -108             Not enough heap space
```

The following errors are relevant to the LaserWriter ONLY.

```
  -4101            Printer closed or not found
  -4100            Connection just closed
  -4099            Write request too big
  -4098            Request already active
  -4097            Bad connection refNum
  -4096            Ne free Connect COntrol Blocks available
```

Page 110-111 of the Postscript Language Reference Manual gives a listing of
the error messages that reside in the LaserWriter in the errordict.
