TOPIC -----------------------------------------------------------

This article describes text spacing issues with System Software version 4.1.

DISCUSSION ------------------------------------------------------

Using System 4.1 and LaserWriter or LaserWriter Plus, you may experience
text spacing problems, either with screen fonts or text fonts, or with both.

- A problem in the System 4.1 software occasionally corrupts the Fond
  resource, causing a font to space incorrectly. To correct the Fond
  resource, remove the offending fonts (all sizes) using Font D/A Mover
  3.6, and reinstall them. This action will force the font table in the
  Fond resource to be recreated, which will correct the problem.

- Also, under the Print option in Microsoft Word 3.01, there is a selection
for printing WITH or WITHOUT fractional widths. This option defaults to
WITHOUT (not using fractional widths,) and must be selected to obtain
correct spacing with LaserWriter fonts.
