Page Setup: What Happens When Font Substitution? Is Deselected

Article Created: 13 February 1988
Article Last Reviewed: 5 November 1991
Article Last Updated: 18 October 1988

TOPIC ---

When you deselect "Font Substitution?", what size of the bitmapped font
is sent to the LaserWriter?

DISCUSSION --

The font is scaled by the Macintosh Font Manager. If the Font Manager can't
find a font of the requested size, and font scaling is enabled, it follows
the standard scaling algorithm (described in "Inside Macintosh" Volume I,
chapter 7) with one exception: if it can't find a font that's either double
or half the requested size, it looks for the font that's closest to the
requested size, larger or smaller.
